

## **Broadband gets better**

WYONG is among the first places in the country to receive the latest national mobile broadband service with the release of the new Telstra BigPond ultimate USB modem in the area.

Telstra Country Wide area general manager Chris Cusack said the device would make it easier than ever to access fast, reliable internet while on the go.

"It will provide users with mobile broadband speeds on a par with what they experience at home or in the workplace," Mr Cusack said.
